Hi -- just want to let you know that Sheila and I talked about the questions regarding the number of samples that will be collected and expected costs. Sheila will work with Elizabeth. Sheila will provide these answers by tomorrow evening.

Subject: Triangle Lake Air Sampling Money

Hi all. Margo is the Childrens Health Coordinator for Region 10. I asked her to inquire about available money from OCHP for air sampling near Triangle Lake and below is the reply.

Can someone assist me by drafting a few bullets? IE number of samples that will be collected? expected costs? Testing for atrazine and 2,4,D in the air similar to Dr Barr study? How has OPP been involved? Anyone else from HQ? etc

This handout is the only background material I have to share: [attachment "ET Pitchfork Rebellion presentation final handout.pdf" deleted by Linda Liu/R10/USEPA/US]

Thanks!

Subject: Re: Fw: have you heard back from Margo re HQ Office of Children's Health?

Hey Juliann. I mentioned it on a call today with Peter Grevatt from OCHP. He seemed receptive, but wanted some more info, including who else from HQ is involved and has been approached. If you wouldn't mind, could you put together a few bullets for me with background and details that I can send to him tomorrow morning? I've been swamped today and am going on vacation all next week. If you can get it to me tomorrow morning, I can send to Peter tomorrow. Otherwise, you can send directly to Peter Grevatt and Khesha Reed with a cc: to Matthew Davis. You can just say you are following up since I am out. Sound good? Thanks. I'm swamped trying to finish up today.

Hi Scott -- just want to let you know that I also left a voice mail with Jill Bloom, asking her if there is any available money at OPP for the air monitoring.

Subject: Highway 36 update

Greetings,

This email provides some updates for the Highway 36 investigation. Most of our activities have been focused on recruitment, communications with the community, and assisting ATSDR personnel in Atlanta with their protocol for the human biosampling aspects of this investigation.

**Recruitment:**

-After a few false starts, OHA has (hopefully) delineated our recruitment area. In order to meet ATSDR's requirements for an exposure investigation, we are recruiting participants who live within 1.5 miles of 2010/2011 clearcuts in/near Highway 36 in the following township ranges: 16S, 7W; 17S, 8W; and 16S, 6W. The attached map shows the three general recruitment areas (indicated by the aqua-blue boxes). We will prioritize recruitment in the Priority 1 area (centered around Triangle Lake). If we need to recruit outside of this area, we will focus on the

Priority 2 area. Our hope is that we will get at least 40 participating households between these two areas - if not, we may need to move to the Priority 3 area.

-OHA will be making calls to schedule appointments over the next two weeks.

*Request for spray notifications/records*

-We plan to request spray notifications/records from ODA and ODF for the following township/ranges (indicated in light blue boxes on the map): 15S, 8W; 15S, 7W; 15S, 6W; 16S, 8W; 16S, 7W; 16S, 6W; 17S, 8W; 17S, 7W; 17S, 6W.

*Sampling/Analysis*

-ATSDR and OHA staff will be in the field to collect urine samples between Tuesday, 8/30 and Thursday, 9/1.

-OHA is coordinating with ODA/DEQ/EPA on finalizing the analyte list for environmental samples, and determining threshold values to evaluate sample results. We also are working with agencies' legal experts to answer some questions related to sampling results and confidentiality of participants.

*Communication/Outreach:*

-Investigation's website is up. Go to [www.healthoregon.org/ehap](http://www.healthoregon.org/ehap) and click on "Get more information on the exposure investigation"

-OHA is providing updates to community members (through a list-serv) approximately once a week. The next update will probably go out later this week.

Please let me know if you have any questions.

Thanks,

Sujata
